Election/Restrictions

Applicant's election of claims 1-25 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

1. This application contains claims 26-27 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-24 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, not tied to the technological arts, failing to include non-trivial technology in the body of the claims.

Claim Rejections - 35 USC § 112

1. Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This rejection is directed to the language "if any" as it appears in claim 1. This term introduces several potential and undefined alternatives in the case where the memory billing numbers database is void. The courts and the MPEP have addressed this and have held that a rejection under 35 U.S.C. 112, second paragraph is required. Moreover, in the case in which there are no billing numbers for

prior calls to the terminating ANI, it is not clear what functions the claimed system, comprising the claimed processor, performs in addition to receiving data comprising a originating ANI, a terminating ANI and a billing number.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US Patent # 5768354.

Figures 1-2 teach a system and method comprising a processor, memory and related software wherein the processor receives data related a current call, the received data including at least the terminating ANI and a billing number. The claims include optional language directed to the scenario in which the processor retrieves billing number from memory. The examiner has interpreted the claims to read on the scenario in which no prior billing number exists.
